ACCOUNTANTS

## Accounting made faster, simpler and more efficient

For 25 years, BankLink has been helping business owners like you make their accounting quicker and easier. Your accountant recommends The BankLink Service as it helps them work more effectively with you by providing them with an electronic copy of your bank account transactions.

### The easy way to manage your accounting

BankLink will save you time and effort on your accounting – it virtually eliminates manual data entry and takes the pain away when it comes to your GST and BAS requirements. Your bank transactions are sent direct to your accountant, so you won't need to supply them with your receipts, bank statements or any other paperwork and you'll have fewer queries from them.

The real-time financial reporting tools (like cash flow and P&L) also mean you'll be able to make quick decisions about your business, and use them in discussions with your financial institution.

BankLink's solutions are simple to use, making it easier than ever to work with your accountant to manage your monthly bookwork. Plus there's no need for complex and expensive software packages.

The incredible level of security ensures you'll have peace of mind – the service is not connected to internet banking and you will never be asked to disclose your bank passwords.

BankLink has a range of solutions to help you work with your accountant when they need extra detail about your transactions. Your accountant will recommend the solution which is right for you.

- » **BankLink Notes** (online or desktop software) – a simple solution where you enter the extra detail your accountant requires. Can be accessed online anytime and anywhere, or installed as desktop software.
- » **BankLink Books** – a software solution that gives you the option to be more involved in your day-to-day bookwork. You can do your own BAS and view important financial reports like cash flow and P&L.
- » **BankLink Coding Report** – a basic paper-based list where you write in the extra detail.

There are also solutions to help you easily manage your business:

- » **BankLink InvoicePlus** – create professional invoices, receipts, statements and letters.
- » **BankLink PayablesPlus** – keep track of your purchases including reporting, supplier lists and purchase orders.
